PROFESSIONAL PROFILE

Systems engineer, junior software engineer with a strong background in web development, including experience with front-end, back-end and database technologies, highly motivated, dedicated and passionate about software development and solving challenging technology problems, with experience in providing technical support and developing software solutions. Skilled in solving complex problems, delivering high quality code, in addition to working in a dynamic and demanding environment. Able to work independently or as part of a team, with communication and project management skills.

Currently holding position as a junior programmer and support engineer, with over 4 years of experience in developing project requirements and supporting enterprise web applications. My focus is on delivering results with discipline, honesty and accountability. I possess an outstanding learning ability and my ability to work both independently and as part of a team, in addition, I am analytical, organized and punctual. My work experience includes programming in several languages, such as Java, JavaScript, HTML5, CSS3 and JSP, as well as relational database management such as Oracle, SQLServer and Postgres.

WORK EXPERIENCE

Support engineer and programmer at MEGASOFT S.A.S.

- January 2019 – Currently
- Debugging and troubleshooting of web applications and interfaces.
- Developed new functionalities and maintained existing ones.
- Provided technical support to customers, resolving company software issues in a timely and efficient manner.
- Collaborated with cross-functional teams to identify and prioritize software and system requirements, ensuring successful completion of projects within tight deadlines.
